

Trevon Gee

Dallas, TX (but willing to relocate)

Phone: (314)-736-0689 | **Email:** gee.trevon09@gmail.com

Portfolio: trevongee20.github.io

Developer with Front-End focus, eager to learn in an ever growing career.

Skills

Proficient in HTML, CSS, JavaScript, React/Redux, Team Environments

Projects

Burger Builder App <https://github.com/TrevonGee20/Burger-builder>

This app was created using React.JS and Redux.Js and uses new features introduced in ES6. It is a single page app and is also mobile responsive. The app uses proper authentication, form validation, and implements React Router.

Forkify <https://github.com/TrevonGee20/forkify-app>

Designed from a Udemy course, this app uses an API to find recipes from your searched word. This app was created using JavaScript, using multiple event listeners and objects

Pig Game <https://github.com/TrevonGee20/Pig-Game>

This is a fun two player dice game where the first to 100 wins. Keep rolling the dice to add to your score but if you roll a 1 your score resets. Developed with HTML, CSS, and Javascript manipulating DOM elements.

Budget App <https://github.com/TrevonGee20/Budgety>

This project was created using JavaScript and is a simple budget app that lets you add in you profits and expense to better control you money. I used multiple event listeners and the Latest JavaScript features to develop this app.

Work History

DrillComm Sound and Cellular

- Install and maintained oil rig communications for oil rigs across West Texas
- Worked w/ NOC in creating and troubleshooting scripts for router-boards and make accessibility for remote troubleshooting easier

United States Air Force

- Learned about discipline and being accountable
